

The Agitator

This device assists in making the Rhino unit extremely user friendly. In situations when drainage is blocked by excess oil or grease this device allows the user to agitate the filter and assist the drainage process without having to open the lid. We have had very positive feedback from all customers who have installed this device. It can be easily installed in minutes.

Push to activate
(spring loaded)

internal spatula
squeezes the filter
bag to increase
drainage
